

DIAMOND POLYMERS

DP255 – TECHNICAL DATA

FLEXIBLE CRACK BRIDGING (novolac) PRIMER/SEALER

PRODUCT DESCRIPTION:

DP255 is a two component 100% urethane/epoxy hybrid coating designed for applications on traffic surfaces exposed to vehicular or foot traffic for either exterior or interior applications. The toughness and elongation eliminate the need to repair hairline cracks.

RECOMMENDED FOR:

Recommended for a priming light to medium duty secondary containment or as a crack bridging primer for many suitable topcoats.

SOLIDS BY WEIGHT:

100% (+/-1%)

SOLIDS BY VOLUME:

100% (+/-1%)

VOLATILE ORGANIC CONTENT:

Zero pounds per gallon

COLORS AVAILABLE:

Hazy clear

RECOMMENDED FILM THICKNESS:

10-50 mils

COVERAGE PER GALLON:

32-160 square feet per gallon @ 10-50 mils

MIX RATIO:

9.05 pounds (1 gallon) part A to 4.35 pounds (.50 gallons) part B (volumes approx.)

PACKAGING INFORMATION:

3 gallon kits (volume approximate)

15 gallon kits (volume approximate)

SHELF LIFE:

1 year in unopened containers

FLEXURAL STRENGTH:

4,035 psi @ ASTM D790

COMPRESSIVE STRENGTH:

6,800 psi @ ASTM D695

TENSILE STRENGTH:

3,150 psi @ ASTM D638

ULTIMATE ELONGATION:

20%

GARDNER VARIABLE IMPACTOR:

100 inch pounds direct – passed

ABRASION RESISTANCE:

Taber abraser CS-10 calibrase wheel with 1000 gram total load and 500 cycles= 5 mg loss

ADHESION:

450 psi @ elcometer (concrete failure, no delamination)

HARDNESS:

Shore D= 70

VISCOSITY:

Mixed= 10,000-14,000 cps (typical)

DOT CLASSIFICATIONS:

Part A “not regulated”

Part B “CORROSIVE LIQUID N.O.S., 8, UN1760, PGIII”

CURE SCHEDULE: (70°F)

Pot life (1 1/2 gallon volume)..... 20-30 minutes

Tack free (dry to touch)7-9 hours

Recoat or topcoat7-10 hours

Light foot traffic 24 hours

Full cure (heavy traffic)..... 2-10 days

APPLICATION TEMPERATURE:

60-90 degrees F.

CHEMICAL RESISTANCE:

REAGENT	RATING
xylene	C
1,1,1, trichloroethane	C
methanol	B
ethyl alcohol	B
skydrol	C
10% sodium hydroxide	C
50% sodium hydroxide	C
10% sulfuric acid	C
70% sulfuric acid	A
10% HCl (aq)	C
5% acetic acid	B

Rating key: A - not recommended, B - 2 hour term splash spill, C - 8 hour term splash spill, D - 72 hour immersion, E - long term immersion. NOTE: extensive chemical resistance information is available through your sales representative.

PRIMER:

None required (optional DP257)

TOPCOAT:

DP321/324 colored aliphatic urethanes can be used for increased UV stability.

LIMITATIONS:

- *Clarity of color or gloss may be affected by environmental conditions such as high humidity, low temperatures, or chemical exposure.
- *Clarity of color may vary from batch to batch. Therefore use only product from the same batch for an entire job.
- *This product is not UV color stable and exposure to lighting such as sodium vapor lights may cause product discolorations.
- *This product is not intended as a decorative coating, but merely as a primer or sealer for bridging cracks.
- *Substrate temperature must be 5°F above dew point.
- *All new concrete must be cured for at least 30 days prior to application.
- *See reverse side for application instructions.
- *Physical properties are typical values and not specifications.
- *See reverse side for limitation of our liability and warranty.

- 1) **PRODUCT STORAGE:** Store product at normal room temperature. Continuous storage should be between 60 and 90 degree F. Low temperature or temperature fluctuations may cause product crystallization.
- 2) **SURFACE PREPARATION:** The most suitable surface preparation would be a fine brush blast (shot blast) to remove all laitance and provide a suitable profile. All dirt, foreign contaminants, oil, and laitance must be removed to assure a trouble free bond to the substrate. A test should be made to determine that the concrete is dry; this can be done by placing a 4'x4' plastic sheet on the substrate and taping down the edges. If after 24 hours, the substrate is still dry below the plastic sheet, then the substrate is dry enough to start coating.
- 3) **PRODUCT MIXING:** This product has a mix ratio of 9.05# part A to 4.35 part B or two parts A to one part B by volume. Standard packages are in pre-measured kits and should be mixed as supplied in the kit. We highly recommend that the kits not be broken down unless suitable weighing equipment is available. After the two parts are combined, mix well with slow speed mixing equipment such as a jiffy mixer until the material is thoroughly mixed and streak free. After mixing, transfer the mixed material to another pail (the transfer pail) and again remix. The material in the transfer pail is now ready to be applied on the substrate. Improper mixing may result in product failure.
- 4) **PRIMING:** Primers may be beneficial in some applications, dependent on performance characteristics and substrate conditions, but none are required for product application.
- 5) **PRODUCT APPLICATION:** The mixed material can be applied by brush or roller. However, the material can also be applied by a suitable serrated squeegee and then back rolled as long as the appropriate thickness recommendations are maintained. Maintain temperatures and relative humidity within the recommended ranges during the application and curing process. If concrete conditions or over aggressive mixing causes air entrapment, then an air release roller tool should be used prior to the coating tacking off to remove the air entrapped in the coating.
- 6) **RECOAT OR TOPCOATING:** If you opt to recoat or topcoat this product, you must be sure that the coating has tacked off before recoating. However, all previous coats should be deglossed to insure a trouble free bond prior to application of recoats or topcoats. Colder temperatures will require more cure time for the product before recoating or topcoating can commence. Before recoating or topcoating, check for epoxy blushes (a whitish, greasy film, or deglossing). If a blush is present, it can be removed by any standard detergent cleaner prior to topcoating or recoating. Many epoxy coatings and urethanes as well as multiple coats of this product are compatible for use as a topcoat.
- 7) **CLEANUP:** Use xylol
- 8) **FLOOR CLEANING:** Caution! Some cleaners may affect the color of the floor installed. Test each cleaner in a small area, utilizing your cleaning technique. If no ill effects are noted, you can continue to clean with the product and process tested.
- 9) **RESTRICTIONS:** Restrict the use of the floor to light traffic and non-harsh chemicals until the coating is fully cured (see technical data under full cure). It is best to let the floor remain dry for the full cure cycle.

NOTICE TO BUYER: DISCLAIMER OF WARRANTIES AND LIMITATIONS ON OUR LIABILITY

*We warrant that our products are manufactured to strict quality assurance specifications and that the information supplied by us is accurate to the best of our knowledge. Such information supplied about our products is not a representation or a warranty. It is supplied on the condition that you shall make your own tests to determine the suitability of our product for your particular purpose. Listed physical properties are typical and should not be construed as specifications. **NO WARRANTY IS MADE, EXPRESSED OR IMPLIED, REGARDING SUCH OTHER INFORMATION, THE DATA ON WHICH IT IS BASED, OR THE RESULTS YOU WILL OBTAIN FROM ITS USE. NO WARRANTY IS MADE, EXPRESSED OR IMPLIED, THAT OUR PRODUCT SHALL BE MERCHANTABLE OR THAT OUR PRODUCT SHALL BE FIT FOR ANY PARTICULAR PURPOSE. NO WARRANTY IS MADE THAT THE USE OF SUCH INFORMATION OR OUR PRODUCT WILL NOT INFRINGE UPON ANY PATENT.** We shall have no liability for incidental or consequential damages, direct or indirect. Our liability is limited to the net selling price of our product or the replacement of our product, at our option. Acceptance of delivery of our product means that you have accepted the terms of this warranty whether or not purchase orders or other documents state terms that vary from this warranty. No representative is authorized to make any representation or warranty or assume any other liability on our behalf with any sale of our products. Our products contain chemicals that may **CAUSE SERIOUS PHYSICAL INJURY. BEFORE USING, READ THE MATERIAL SAFETY DATA SHEET AND FOLLOW ALL PRECAUTIONS TO PREVENT BODILY HARM.***
