Blome International is a manufacturer of Corrosion Resistant Vinyl Esters, Polymer Concretes and Carbon Fiber Materials for industrial process applications and a leader in chemical containment.

CIM Elastomeric Urethanes form a seamless barrier to water and most chemical solutions. CIM may be applied by squeegee, roller, trowel or sprayer and the liquid cures quickly to form a barrier with tremendous strength and flexibility.

Wasser moisture cured urethane (MCU) coatings are one component products that eliminate the numerous application restrictions and performance problems inherent in 2 component products.

Diamond Polymers is a high end, solution based product line of protective, decorative and restorative flooring and roofing systems.

With over 40 years of proven history, IECC's Enviroline Products feature single coat, thick film, Zero VOC's, Fast Cure products that include advantages over thin film coatings such as; Impact and Abrasion Resistance and Chemical Resistance.

Since 1995, Mascoat Products has been one of the leading experts for Insulating Coatings, Ceramic Insulating Paint and Sound Damping Coatings for all types of surfaces and applications.

Dampney - Thurmalox
High Heat
Protective Coatings

For over 80 years, Dampney has manufactured the most technically advanced heat resistant and corrosion resistant coatings in all industry.
